Software Developer | | Start-up Enthusiast

Summary:

Software Engineer and startup co-founder with 3+ years of hands-on experience building scalable, user-centric web applications. Specialized in NextJs, React, TypeScript, and modern frontend ecosystems with a strong focus on performance optimization, real-time features, and AI integration. Proven ability to deliver production applications in fast-paced startup environments, particularly in EdTech and Hospitality. Passionate about solving real-world problems through clean code and innovative product development.

Technical Skills:

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Tailwind CSS, Vite, Zustand, Redux

Tools & Platforms: Firebase, Cloudinary, GitHub Copilot, Figma, Dialogflow, OpenRouter, i18next.

Core Competencies: Responsive Design, RESTful APIs, WebSockets, Real-time Applications, CRUD Operations, PWA, Performance Optimization, Web Accessibility, Agile Development

Experience:

Frontend Software Engineer 2024 - Present

Rad5 Tech Hub, Aba, Abia State

Assisting in the development of web applications using React, JavaScript, and Typescript Participating in code reviews and working closely with senior developers to improve code quality. Building and shipping ventures at Rad5 Venture Studio.

- Developed and shipped multiple production web applications using **React**, **TypeScript**, **Next.js**, and Tailwind CSS, delivering high-quality user experiences for EdTech and Hospitality sectors.

- Built real-time chat applications featuring live messaging, reply, edit, and delete capabilities using WebSockets.
- Integrated multilingual support with **i18next**, improving accessibility for diverse user groups.
- Collaborated with founding teams and senior developers to ideate, design, and launch internal ventures and client products.
- Conducted JavaScript training sessions focused on core concepts, debugging, and performance best practices.
- Actively participated in hackathons and rapid prototyping initiatives, including a competitive event with a ₦500,000 prize pool.

Key Start-ups & Projects:

ScanRevuAI — Nigeria's #1 AI Review Platform for Hotels & Restaurants

- Co-developed an AI-powered review aggregation and analysis platform that helps hospitality businesses manage customer feedback and improve service quality.

Batterly — Trade-by-Barter E-commerce Platform

- Built a peer-to-peer exchange platform enabling users (primarily students and tech professionals) to trade goods and services without cash.

CivicSpark — Civic Engagement & Government Reporting Platform

- Developed a web platform allowing citizens to report civic issues with a dedicated government dashboard for report management and response.

D18 Studios — Design & Development Agency

- Contributed to full-cycle web solutions for branding, design, and development client projects.
