Practices: Responsive Design, API integration, WebSockets, CRUD operations, Performance Optimization, PWA, Real-time Communication, Web Accessibility, SWOT application, Lean methodology for start-up etc.

Experience:

Frontend Web developer Intern 2024 -

Rad5 Tech Hub, Aba, Abia State

Assisting in the development of web applications using React, JavaScript, and Typescript. Participating in code reviews and working closely with senior developers to improve code quality. Building and shipping ventures at Rad5 Venture Studio.

- Teaching JavaScript with a focus on loops, debugging, and performance.
- Built real-time chat applications with reply, edit, and delete features.
- Participated in hackathons, including one with a \$500,000 prize pool.
- Collaborated with a small founding team to brainstorm and build solutions in key sectors.
- Integrated multilingual UI using i18next for inclusive app experiences.

Start-ups:

Start-ups I helped build:

Batterly: An e-commerce exchange platform integrating the trade by barter strategy. The target audience are mostly tech people and students who want to exchange materials or items even when they are low on funds.

CivicSpark: An online ombudsman where citizens can report insurgence and civic problems to the government. Built for states and integrates a government administration dashboard to receive civic reports.

D18 Studios: A design agency that solves design, branding and development needs for their customers.
